

SAFETY DATA SHEET

This SDS adheres to the standards and regulatory requirements of the United States and may not meet the regulatory requirements in other countries.

1. Identification

Product identifier Aquabon

Other means of identification Material Number: 57956490

Recommended use Oxidizing agent **Recommended restrictions** None known

Manufacturer/Importer/Supplier/Distributor information

Manufacturer

Company name International Dioxcide, Inc.

Address 40 Whitecap Drive

North Kingstown, RI 02852 United States of America

Telephone Information #: (800) 477-6071

Website https://idiclo2.com

E-mail idiclo2@ercoworldwide.com

Emergency phone number Canada & U.S.A.: (800) 424 9300 (CHEMTREC)

International: (703) 527 3887

Supplier Refer to Manufacturer

2. Hazard(s) Identification

Physical hazards None

Health hazards Acute toxicity, oral Category 4

Skin irritationCategory 2Eye irritationCategory 2BSpecific target organ toxicity, repeatedCategory 2

exposure (blood, kidneys, liver, spleen)

Environmental hazards Not currently regulated by OSHA, refer to Section 12 for additional

information.

OSHA defined hazards

This material is considered hazardous by the OSHA Hazard Communication

Standard (29 CFR 1910.1200).

Label elements

Signal word Warning

Hazard statement Harmful if swallowed.

Causes serious eye irritation.

Causes skin irritation.

May cause damage to organs through prolonged or repeated exposure

(blood, kidneys, liver, spleen).

Precautionary statement

Prevention Wear protective gloves and eye/face protection. Do not breathe vapor. Do

not eat, drink or smoke when using this product. Wash hands thoroughly after

handling.

Response IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell. Rinse

mouth.

IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical

attention.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists:

Get medical attention.

IF exposed or concerned: Call a POISON CENTER or doctor.

Storage Not applicable.

Disposal Dispose of contents and container in accordance with all local, regional,

national and international regulations.

Hazard(s) not otherwise classified

(HNOC)

If Sodium Chlorite dries on some types of fire-retardant clothing it is known to cause an exothermic reaction. The reaction has been known to cause burns to skin. Nomex appears to be the only material not to experience this

reaction.

Supplemental information

Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink.

3. Composition/Information on Ingredients

Chemical name	Common name and synonyms	CAS number	Conc. % By Weight
Sodium chlorite	None	7758-19-2	<5 w/w%

Chemical name of impurities, stabilizing solvents and/or additives: Non

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health and hence require reporting in this section.

4. First-Aid Measures

Inhalation Remove victim to fresh air and keep at rest in a position comfortable for breathing.

Get medical attention following exposure or if feeling unwell. If unconscious, place

in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. If not breathing, if breathing is irregular or respiratory arrest occurs, provide artificial respiration, or oxygen by a trained professional, using a pocket type respirator.

Skin Contact

Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. In case of contact, flush skin with plenty of water for at least 20 minutes.

Eye Contact

Check for and remove any contact lenses. Get medical attention. In case of contact, flush eyes with plenty of water for at least 20 minutes. Use fingers to ensure that eyelids are separated and that the eye is being irrigated.

Ingestion

Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Most important symptoms/effects, acute and delayed

Causes serious eye irritation. Adverse symptoms may include watering, redness, reddening, tearing, stinging, and swelling. Causes skin irritation with symptoms of reddening, itching, and swelling. Harmful if swallowed. Irritating to mouth, throat and stomach. Symptoms of ingestion may include abdominal pain, nausea, vomiting, and diarrhea. May cause damage to organs through prolonged or repeated exposure.

Indication of immediate medical attention and special treatment needed

Not available.

General information

Notes to physician: Treat symptomatically. No specific treatment.

5. Fire-Fighting Measures

Suitable extinguishing media

Use an extinguishing agent suitable for the surrounding fire. In case of fire,

use water spray (fog), foam or dry chemical.

Unsuitable extinguishing

None known.

media

Specific hazards arising from the chemical

In a fire or if heated, a pressure increase will occur and the container may burst.

Special protective equipment and precautions for firefighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

If Sodium Chlorite dries on some types of fire-retardant clothing it is known to cause an exothermic reaction. The reaction has been known to cause burns to skin. Nomex appears to be the only material not to experience this reaction.

Firefighting equipment /instructions

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Specific methods

Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards

May intensify fire; oxidizer when dry.

Hazardous combustion products

Decomposition products may include the following materials: halogenated compounds, metal oxide/oxides.

6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

Methods and materials for containment and cleaning up

Stop leak if without risk. Move containers from spill area. Approach release from upwind. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor.

Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. Prevent entry into sewers, water courses, basements or confined areas.

Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Issue Date: 4/1/2022

7. Handling and Storage

Precautions for safe handling

Do not breathe vapor or mist. Do not ingest. Avoid contact with eyes, skin and clothing. Use only with adequate ventilation. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Remove contaminated clothing and protective equipment before entering eating areas. Workers should wash hands and face before eating, drinking and smoking. Put on appropriate personal protection equipment. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.

Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Empty containers retain product residue and can be hazardous. Do not reuse container.

8. Exposure Controls/Personal Protection

Occupational Exposure Limits No exposure limits noted for ingredient(s).

Biological limit values No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Individual protection measures, such as personal protective equipment

Eye/face protection Chemical splash goggles.

Skin protection

Hand protection Permeation resistant gloves.

Other Permeation resistant clothing and foot protection.

> If Sodium Chlorite dries on some types of fire-retardant clothing it is known to cause an exothermic reaction. The reaction has been known to cause burns to skin. Nomex appears to be the only material not to

experience this reaction.

Respirator selection must be based on known or anticipated exposure Respiratory protection

> levels, the hazards of the product and the safe working limits of the selected respirator. A NIOSH approved air purifying respirator with

> > Page **5** of **12**

organic vapor cartridges and particulate prefilter can be used to minimize exposure.

Thermal Hazards If Sodium Chlorite dries on some types of fire-retardant clothing it is

known to cause an exothermic reaction. The reaction has been known to cause burns to skin. Nomex appears to be the only material not to

experience this reaction.

General hygiene considerations

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

9. Physical and Chemical Properties

10. Stability and Reactivity

Reactivity No specific test data related to reactivity available for this product or its

ingredients.

Chemical stability The product is stable.

Possibility of hazardous

reactions

Under normal conditions of storage and use, hazardous reactions will not

occur.

Conditions to Avoid No specific data.

Incompatible materials No specific data.

Hazardous Under normal conditions of storage and use, hazardous decomposition

decomposition products products should not be produced.

11. Toxicological Information

Information on likely routes of exposure

Inhalation No known significant effects or critical hazards.

Skin contact Causes skin irritation.

Eye contact Causes serious eye irritation.

Ingestion Harmful if swallowed. Irritating to mouth, throat and stomach.

Delayed and immediate effects and chronic effects from short-term and long-term exposure

Effects of short-term

(acute) exposure

Causes serious eye irritation. Adverse symptoms may include watering, redness, reddening, tearing, stinging, and swelling. Causes skin irritation with symptoms of reddening, itching, and swelling. Harmful if swallowed. Irritating to mouth, throat and stomach. Symptoms of ingestion may include abdominal pain, nausea,

vomiting, and diarrhea.

Effects of long-term (chronic) exposure

May cause damage to organs through prolonged or repeated exposure.

Information on toxicological effects

Acute toxicity

Product		Species	Test Results
Aquabon			
	Acute		
	LD50 Oral	Rat	1075 mg/kg (Test results for a product at higher concentration)

Page **7** of **12**

Issue Date: 4/1/2022

LD50 Dermal Rat >2000 mg/kg (Test results for a

product at higher concentration)

LD50 Inhalation (dusts Rat >6.53 mg/l over a 4 hour exposure

and mists) (Test results for a product at higher

concentration)

* Estimates for product may be based on additional component data not shown.

Skin corrosion/irritation Moderate irritant (Test results for a product at higher

concentration)

Serious eye damage/eye irritation Mild irritant (Test results for a product at higher

concentration)

Respiratory or skin sensitization

Respiratory sensitization Not sensitizing.

Skin sensitizer Not sensitizing.

Germ cell mutagenicity Not mutagenic in a standard battery of genetic toxicological

tests. Did not show carcinogenic or mutagenic effects in

animal experiments.

Carcinogenicity This product is not considered to be a carcinogen by IARC,

ACGIH, NTP, or OSHA.

IARC Monographs. Overall Evaluation of

Carcinogenicity

Sodium Chlorite (CAS 7758-19-2) Not classifiable as to

carcinogenicity to humans.

OSHA Specifically Regulated

Substances (29 CFR 1910.1001-1050)

Not listed.

Reproductive toxicityNot classified as a reproductive toxin.

Specific target organ toxicity - single

exposure

Not classified as a specific target organ toxicity -single

exposure.

Specific target organ toxicity - repeated

exposure

Specific Target Organ Toxicity (STOT), Repeated Exposure:

blood, kidneys, liver, spleen.

Aspiration toxicity Not expected to be an aspiration hazard.

Chronic effects Chronic skin contact with low concentrations may cause

dermatitis. Prolonged or repeated overexposure may cause

blood, liver, spleen and kidney effects.

12. Ecological Information Ecotoxicity

Page **8** of **12** Issue Date: 4/1/2022

Product Species Test Results

Sodium Chlorite (CAS 7758-19-2)

Aquatic

Acute

Algae EC_{50} Green algae (Selenastrum capricornutum) 1.2 mg/l Crustacea EC_{50} Water flea (Daphnia) 0.025 mg/l Fish LC_{50} Sheepshead minnow (Cyprinodon variegatus) 110 mg/l

Chronic

Algae EC₅₀ Green algae (Selenastrum capricornutum) 1 mg/l **Persistence and degradability** Biodegradation is not applicable to inorganic substances.

Bioaccumulative potential The product itself has not been tested

Mobility in soil In soil, will degrade to sodium chloride but may form chlorine

dioxide in contact with acidic soils. Chlorate is an intermediate product of decomposition; it will slowly degrade to chloride.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion,

photochemical ozone creation potential, endocrine disruption, global

warming potential) are expected from this component.

13. Disposal Considerations

Disposal instructions The

The generation of waste should be avoided or minimized wherever possible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Waste disposal should be in accordance with existing federal state, provincial and or local

environmental controls laws.

Local disposal regulations

Dispose in accordance with all applicable regulations.

Hazardous waste code

If discarded in its purchased form, this product would not be a hazardous waste either by listing or by characteristic. However, under RCRA, it is the responsibility of the product user to determine at the time of disposal, whether a material containing the product or derived from the product

should be classified as a hazardous waste. (40 CFR 261.20-24)

Waste from residues / unused products

Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

Contaminated packaging

Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14.Transport Information

DOT Not regulated.

IATA Not regulated.

IMDG Not regulated.

Not available.

Transport in bulk according to Annex II of MARPOL 73/78 and the

IBC Code
